Challenger has made a number of material improvements with regard to gender composition during the reporting period.

Effective 31 March 2018, women represented 43.3% of the organisation overall and 38.6% of women in management roles. Our FY20 target of 38% for women in management roles has already been met and for women in the organisation, we are well on the way to reaching our FY20 target of 45%.

In terms of the categories above, compared to the prior reporting period, we note the following improvements:

- Female promotions accounted for 52% of all promotions (increasing from 28%)
- Female appointments accounted for 56% of all management appointments and 48% of all non-manager appointments (increasing from 43% and 42% respectively)
- Female resignations for management positions accounted for 23% of all resignations (decreasing from 42%).

As part of the annual remuneration review process, Challenger conducts a gender remuneration gap analysis.

As well as analysing the gender remuneration gap for like-for-like roles, Challenger analyses its performance across the categories of non-management, other management and senior management and communicates these outcomes in the annual Sustainability Report.

We are pleased to note the following improvements in 2018 for average female base salary as a proportion of male average base salary:
